

IFABOND™

Synthetic glue

Surgical tissue glue

Rejoindre l'innovation 

- **Synthetic:** avoid all risk coming from animal or human component
- **Biocompatibility:** non toxic, non irritant, non sensitive and non mutagene
- **Sterile:** beta radiation (inside and outside the flask are sterile)
- **Biodegradable:** total resorption until 6 months
- **Universal and interstitielle:** suitable with majority of surgical procedure (see on reverse side)
- **Safety:** single use, prevent all traumatism coming from suture
- **Practical and economical:** no preliminary preparation required before use, easy to apply, time saving for treatment
