

MÉMOIRE VIVE®

PROTECTING MEMORY AND MENTAL ALERTNESS

COMPLIANCE WITH LRN HIGH-SAFETY CHARTER

- 100% natural products
- No GMOs
- No gelatine
- No preservatives
- No side effects
- Ingredients meticulously selected for their total safety

> THE PRODUCT

In order to keep a good memory and intellectual capacity at all age, good brain nutrition is a must particularly in 2 key brain nutriments: **Phosphatidylserine (PS)** the brain's phospholipid and **DHA** the brain's fatty acid.

Two key ingredients which have widely demonstrated their efficacy on memory and brain efficiency in many clinical studies. Due to changes in our food habits, the intake of these 2 key nutriments is not sufficient.

> PERFORMANCE

MÉMOIRE VIVE is the first food supplement offering a global, efficient, DAY & NIGHT, natural solution combining PS & DHA which adapts to the specific chronobiology of human brain.

MÉMOIRE VIVE DAY orange tablet contains 120 mg of PS 100% vegetal (patented innovation) which is **the highest dosage ever proposed in this key brain essential nutriment** in order to improve and enhance memory and brain performance during the day.

MÉMOIRE VIVE NIGHT grey tablet contains 60 mg of DHA from wild fish. In synergy with PS, DHA boosts key memorisation processes which occur during sleeping at night.

> INSTRUCTIONS

MÉMOIRE VIVE is safe and induces no side effects.

It can be used in repeated cures all-year long.

1 DAY Tablet: in the morning.

1 NIGHT Tablet: in the evening at diner.

> PRÉSENTATION

Box of 28 tablets.
