# R&D is the core of our activity

Located in the heart of a science park dedicated to the food industry research in Saint-Brieuc, Brittany, OLIGOCAPS Développement has developed from the original profession of its managers : Research and Development.

Created in 1996, our company becomes apparent as a major player in :

- Formulation of slimming, health and beauty oriented food supplements
- Development and distribution of exclusive ingredients

As part of its activity, our company proposes also to its French and foreign partners to take care of all scientific, industrial and regulatory developments needed to introduce food supplements on the market.

NEW

We develop products conform to specific schedules of conditions : ORGANIC certification, HALLAL...

## One single company from the product development to the market launch

### ● Innovation and flexibility

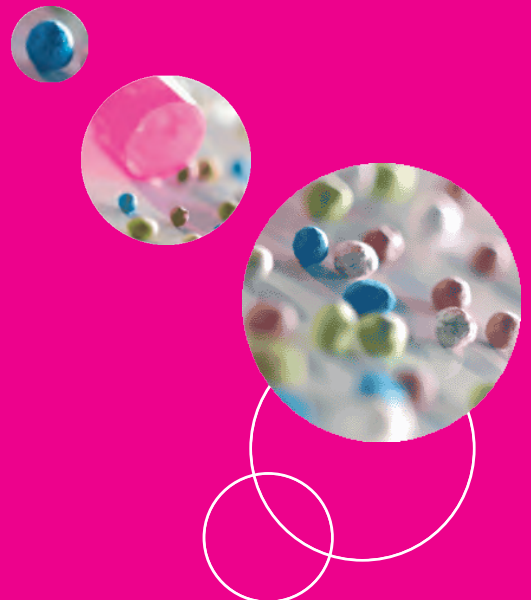

- We make available the formulae from our catalogue which have been developed from active ingredients selected by our R&D department.
- We adapt these formulations to the expectancies of your marketing department and to the technical and regulatory constraints of your country.

### ● Your turn key products

- Development from A to Z of the products you intend to launch on the market respecting your schedule of conditions.
- We propose innovative galenic forms to boost your sales
- Marketing assistance and graphic design (packaging, displays...)-

### ● Regulatory assistance

- Our scientists are at your disposal to provide you with the files needed for the registration of products : technical sheets, stability studies, bibliography.
- Collaboration in the label writing

# Our international partnerships

OLIGOCAPS Développement has developed partnerships in various countries among which Italy, Poland, Spain, Ukraine, Russia..

We favour long-term and personalized partnerships and propose different forms of collaborations :

- Supply of developed food supplements in bulk or finished products under our partners' brand.

- R&D : innovation and creation of exclusive products for our partners.

- Distribution of products under our brands : Plénilife<sup>®</sup>, Mincitonic<sup>®</sup>, Kinosphérine<sup>®</sup>, Oligosphérine<sup>®</sup>.

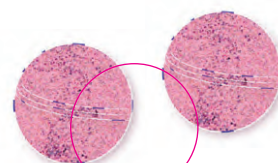

## Give a boost to your sales with our new galenic forms

The research of OLIGOCAPS Développement has enabled to patent performing active ingredients, innovative galenic forms which give a better bioavailability of the nutriment and a higher effectiveness of products

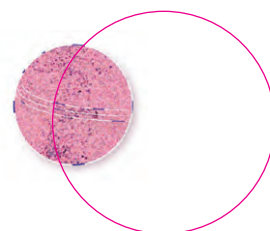

- **Kinosphérine<sup>®</sup>**, patented fat blocker ingredient of marine origin, comes in the form of black time-released microgranules
- **Oligosphérines<sup>®</sup>**, coloured microgranules, have a specific double shell structure to protect the encapsulated active substances and to enable their progressive release nearest the site of action.

We place at your disposal all these various innovations to expand your offer.
