

# X-Tense®

## Frechet Extender

### Skin Extender

The **X-Tense Frechet Extender** is a special skin extension device perfectly adapted for alopecia, surgical reconstruction treatments for scars, burns, tattoos...

### New generation

The **X-Tense Frechet Extender** is composed of a new generation silicone elastomer sheet with two rows of titanium hooks on each side.

### Features

Due to this new biomaterial developed by **MXM** well known in similar technologies for many years now, The **X-Tense Frechet Extender** displays the following features:

**Excellent tissular biocompatibility** decreasing the tissular adhesion risk to the extender.

**Maximised extension** due to the 500 % stretching of the device from the initial length.

**Return to the start position** after a short time extension ( 30 to 45 days).

**Progressive and soft extension** due to the better sliding of the extender in relation to tissues during the extension.

### Sizes

The **X-Tense Frechet Extender** is sold in a sterile ready to use packaging in 2 different sizes:

Ref.: 130 : 30 mm **X-Tense Frechet Extender** allowing a 150 mm extension.

Ref.: 140 : 40 mm **X-Tense Frechet Extender** allowing a 190 mm extension.

Ref.: 085 Special Frechet surgical instrument to place **X-Tense Frechet Extender** hooks.
